6. REPORTS OF OFFICERS

Township Supervisor Danielle Chynoweth provided a written report to the board. She noted that GA participation is at 118 individuals this month and commented, that based on her third August of observations, that this bump upwards follows past patterns and may correspond to summer unemployment spikes in the area. Homeless assistance is down to 25 cases reflecting a number of closures. She also stated that all of the Township staff are trained deputy registrars able to register

people to vote during office hours. She noted Township participation in a new NSF grant application with the University of Illinois using smart cities technology, the recent Labor Day Parade, and plans to be in the upcoming CU Pride parade. These outreach efforts are being made to increase awareness of Township services.

Assessor Wayne Williams provided a written presentation to the board and summarized key slides. Mr. Williams began with an explanation of statistical terms used by Assessors. He described a Sales Ratio Study which aims for an ideal assessment of 33.3% of value, reviewed the Coefficient of Dispersion (COD) with a 15% goal, and provided some historical data. He also provided a slide of 2017 and 2018 COD by racially ranked neighborhoods showing disparity issues. He then described Price Related Differential (PRD) as a tool used to measure assessment bias and provided similar breakdowns contrasting neighborhoods noting that PRD values for Cunningham Township are out of the expected range of .98 to 1.03.

Assessor Williams summarized current problems and noted that assessment measures were good through 2010 and then something happened. He described plans to address these issues stating that they are going to use new technology (CAMA software system), a new digital property cards system, a new website, and by staying educated with current best practices.

Assessor Williams summarized the extensive training he and his staff have taken recently by providing several slides summarizing takeaways including the basics of mass appraisal, preferential assessments, homestead exemptions, residential modeling, and assessments of new properties. He ended his presentation by noting a goal of reassessments of all properties every four years and gave as an example, Neighborhood 21, which was completely revalued.
